Updated 15/2-2022

Oracle Demo environment

—

Username created in the Oracle demo environment are on the format `firstname.lastname` without any domain

When federation from Azure, the unique nameid is with the domain name of Azure Domain you federate from

The solution is to create a custom claim that strips off the domain name from the username that is mapped to IDCS username

Getting Started

1. Assign users and groups

Provide specific users and groups access to the applications

Assign users and groups

2. Set up single sign on

Enable users to sign into their application using their Azure AD credentials

Get started

3. Provision User Accounts

Automatically create and delete user accounts in the application

Get started

4. Conditional Access

Secure access to this application with a customizable access policy.

Create a policy
